

Extrusion 2018

SEPTEMBER 18-20, 2018

Huntington Convention Center of Cleveland, Cleveland, Ohio

RICK BARNES

Paulson Training

Rick Barnes brings forty years of experience to the Plastics Academy, both in industry and education. He holds degrees in Chemical Engineering and Polymer Chemistry from the University of Waterloo, along with Teacher Certification in Plastics Technology from Red River College in Winnipeg, Canada. Rick has applied this knowledge in positions ranging from Process Engineer, Plant Manager, and Production Manager in both Canada and the United States. At the Sturgeon Creek School in Winnipeg he developed and taught a three year Vocational/Industrial program covering most of the technologies and processes in the plastics industry.

Rick has a wide range of technical knowledge in both Injection Molding and Extrusion and has developed training programs for schools and businesses. He has a good knowledge of costing procedures and budgets, and has improved productivity and profitability at various companies, both as an employee and a consultant.

Rick currently is the owner of RGB Plastics & Design, offering bottom-line improvements to the plastics industry through in-house training, process engineering, and design.
