

JOSEPH DZIEDZIC

ACS Group

Joseph Dziedzic is the Manager of the Technical Sales Team for ACS Group.

In his current role, Joe is responsible for implementing equipment and system design solutions to support customer needs for process solutions. Joe and his team support the customer before and after sale to ensure proper implementation of product for the application to the process.

Prior to this, Joe has worked as the Product Development Manager (ACS Group – AEC, Cumberland and Sterling) and was responsible for product development and marketing activities for the company's Material Handling and Process Cooling product lines.

Joe began his career in the Plastics Industry in 1987 with AEC, Inc. and has over 31 years of experience designing equipment and systems. He has a BSME from the University of Illinois – Chicago. Throughout his career, Joe has been involved in almost every key area of the business. He has also worked in many customer process environments worldwide helping to provide a wide range of innovative process solutions.

ACS Group provides the world's broadest line of integrated auxiliary process equipment. The company provides creative and cost effective solutions for injection, extrusion, extrusion blow molding, fiber extrusion, recycling and other industrial processes worldwide. Joe recently stated: "I am part of creating a new ACS Group; a company whose structure and products are designed around customers and their operations. More than ever, we are responsible for working closely together to design processes that leverage today's ever changing technology.
