

**Extrusion 2018**

SEPTEMBER 18-20, 2018

Huntington Convention Center of Cleveland, Cleveland, Ohio

# DANIEL JOSEPH

D.R. Joseph, Inc.

Dan founded DRJ back in 1987 with the idea that the blown film industry could use some engineering help.

That idea grew over the years into patented innovations which resulted in DRJ becoming a global leader in blown film bubble management systems. His current activities include R&D efforts for product development and training systems. He also runs the North American service and support operations for Kundig International, a company specializing in thin film thickness measurement. Daniel also holds a professional engineer's license from the State of Texas.
