

Extrusion 2018

SEPTEMBER 18-20, 2018

Huntington Convention Center of Cleveland, Cleveland, Ohio

JOHN PRESA

Dow Chemical Company

John Presa has been with Dow for thirty-five years and started working with polyethylene in 1989 as a plant operator at one of Dow's high pressure polyethylene plants. Since moving to the R&D area in 1992 he has had the opportunity to operate and install several polyethylene film fabrication machines and processes.

Most of his time has been spent in the blown and cast film fabrication areas. He serves as a laboratory project coordinator, mentors and assists in training new personnel. John holds a Bachelors Degree in Applied Technology with an emphasis in Industrial Management.
