

## RAJIV SIVARAMAN

### Siemens PLM Software Inc.

In his current role as VP Global ecosystem management for Mind Sphere, the open IoT operating system from Siemens, Rajiv is responsible for building the ecosystem for Mind Sphere with a focus on Hybrid Operational Technology partners.

Rajiv brings with him cross Industry vertical experience ranging from manufacturing, healthcare, energy & infrastructure sectors in a career with Siemens spanning over 26 years across three continents. Starting in 1992 as a project engineer with the Industrial solutions & services business in India he went on to startup & head Siemens operations in Sri Lanka before moving to Germany where he held strategic roles such as global head for the Vertical Market, Data Centers, which he helped set up and global segment head for startup value services segment, Condition Monitoring & Reliability, which set base for creation of the data services portfolio within Siemens DF & PD divisions. Rajiv moved to US in 2014 to develop the data services portfolio including Mind Sphere & plant security services in the US market working closely with the sales organization, channels & partners.

Rajiv holds an honors degree in electrical & electronics engineering and currently chairs the NEMA IoT Cybersecurity task force apart from being engaged with academic & research institutions on topics such as Informatics, data driven business models & cyber security. Rajiv is also a founding board member of the European association of Data centers.
