

Extrusion 2018

SEPTEMBER 18-20, 2018

Huntington Convention Center of Cleveland, Cleveland, Ohio

CHERYL WECKLE

Trinseo

Cheryl Weckle is senior development scientist for Trinseo's plastics business. Located in North America and working globally, she's responsible for leading various development projects for some of the largest OEMs globally and supporting them with product design, materials selection, processing and technical concerns. She routinely works with processors acting as expert liaison to Trinseo and the customer.

Weckle has 29 years of experience in plastics. During her career, she has been involved with product development for many markets and applications, including automotive, consumer electronics, consumer durables, and medical. She holds five patents and has expertise in a wide range of materials including polycarbonate, ABS, PC/ABS blends, thermoplastic urethanes, TPO, and engineering compounds.

Weckle earned her BS in chemical engineering from the University of Detroit Mercy. She is Six Sigma certified and located in Midland, Michigan. Prior to her involvement with Trinseo, she spent 20 years with the Dow Chemical Company.
